Volume 66

January 1986

Number 1

CONTENTS

Photoelasticity

- P.V. Reddy and N. Srinivasa Murthy Some observations on stress freezing 1

Inorganic Chemistry

- S.B. Saxena and Y.K. Agarwal Spectrophotometric determination of the stability constants of 4-substituted thiosemicarbazides with Co^{2+} , Ni^{2+} and Cu^{2+} system 13

Instrumentation

- G. Parimala Someswar and B. Subramanyam IR study of ethyl lactate in 3μ region 21

Short Communications

Analytical Chemistry

- D.N. Purohit Glycol dimercaptoacetate as a new masking agent: Determination of zinc in presence of cadmium 29

- S.K. Mishra, A.P. Mishra, V.K. Mishra and K.L. Yadava Interaction of metal ions with pyrimidines 33

- K. Mallikarjuna Rao, T. Sreenivasulu Reddy, and S. Brahmaji Rao Spectrophotometric determination of molybdenum (VI) and vanadium (V) using resacetophenone isonicotinoyl hydrazone 39
