|--|----------|
| Acenaphthene—Condensation of ethyl acetoacetate with 5-amino-                    | 12       |
| "     —Condensation of paraaldehyde with 5-amino-                                | 11       |
| $\beta$ -5-Acenaphthylaminocroton-5-acenaphthylamide                             | 12       |
| $\beta$ -5-Acenaphthylaminocrotonic acid, ethyl ester...                         | 12       |
| 5-Acetoacetamidoacenaphthene   | 12       |
| Acetoacetic ester—Condensation of 5-aminoacenaphthene with                       | 12       |
| Acetic acid from <i>Azotobacter</i> fermentations                                | 86       |
| $\gamma$ -Acetyl- $\gamma$ -methylbutane- $\alpha\beta$ -dicarboxylic acid ...   | 53       |
| <i>l</i> -4-Acetyl-2 : 2 : 3-trimethyl- $\Delta^3$ -cyclohexen-1-carboxylic acid | 54       |
| Activated sludge—Nitrification by  | 102      |
| Aldehyde from <i>Azotobacter</i> fermentations                                   | 85       |
| Alkaline earth sulphates—Decomposition of  | 117, 128 |
| Ammonia-oxidation by activated sludge  | 103      |
| <i>Anora squamosa</i> —Oil from seeds of ...                                     | 28       |
| Arachidic acid from ethyl isocerotate ...  | 58       |
| " <i>Thevetia nerifolia</i>  | 16       |
| <i>Azotobacter chroococcum</i> —Fixation of nitrogen by                          | 79       |
| Bacterial oxidation—Studies in intensive   | 97       |
| Behenic acid, dihydroxy-, from erucic and brassidic acids                        | 83       |
| Brassylis acid from ethyl isocerotate ...  | 62       |
| <i>n</i> -Butyric acid—Esterification of   | 75       |
| Calcium sulphate—Effect of heat on   | 120      |
| Calcium sulphite—Effect of heat on...  | 124      |
| Camphor—Optical influence of sulphur in compounds of                             | 33       |
| Camphorquinone—Action of acetic anhydride on                                     | 54       |
| "     and sulphuric acid—Constitution of acid from                               | 46       |
| "     condensed with aromatic thio-bases   | 37       |
| Carbon as reducing agent for calcium sulphate ...                                | 121      |
| Carbon-balance in <i>Azotobacter</i> fermentations                               | 83       |
| $\Delta^4$ -Carene, attempted production from methyl carylxanthogenate           | 2        |
| <i>l</i> -Carol from <i>d</i> -caryamine   | 3        |
| <i>d</i> -Caronecyanhydrin   | 5        |
| Carone from <i>l</i> -carol by oxidation   | 4        |
| Caroneoxime—Reduction of   | 3        |
| <i>d</i> -Caryamine—Action of nitrous acid on                                    | 3        |
| <i>l</i> -Carylxanthogenate, methyl  | 4        |
| <i>Cerbera odollam</i> —Oil from seeds of ...                                    | 20       |
| Cerotic acid from <i>Anora squamosa</i> ...                                      | 29       |
| Chromite—Sorting, classification and briquetting of                              | 65       |

|   | PAGE.          |
|---|----------------|
| Conductivity measurements in mixed solvents ...                             | 73             |
| Decane- $\alpha\kappa$ -dicarboxylic acid from methyl <i>isoerucate</i> ... | 62             |
| Dehydrothiotoluidine—Preparation of ...                                     | 37             |
| Dextrose-concentration in <i>Azotobacter</i> fermentations—Influence of ... | 82             |
| <i>s</i> -Di-5-acenaphthylcarbamide ...                                     | 13             |
| Dithioaniline—Preparation of ...  | 38             |
| $\rho\rho'$ -Dithiodiphenylenebisimino camphor ...                          | 39             |
| $\rho\rho'$ -Dithiotoluidine—Preparation of ...                             | 39             |
| Dodecane- $\alpha\mu$ -dicarboxylic acid from methyl <i>isoerucate</i> ...  | 62             |
| <i>isoErucic</i> acid, methyl and ethyl esters—Oxidation of ...             | 59             |
| Esterification in mixed solvents ...  | 71             |
| Ethyl alcohol from <i>Azotobacter</i> fermentations ...                     | 85             |
| Fermentation of dextrose by <i>Azotobacter chroococcum</i> ...              | 81             |
| Formic acid from <i>Azotobacter</i> fermentations ...                       | 86             |
| Glycerides from vegetable oils ...  | 19, 23, 27, 31 |
| <i>Holarrhena antidyserterica</i> —Oil from seeds of ...                    | 24             |
| Hydrogen-ion concentration for optimum nitrification ...                    | 114            |
| Iron as decomposing agent for calcium sulphate ...                          | 126            |
| „ salts—Influence of, on nitrification ...                                  | 100, 112       |
| Lactic acid from <i>Azotobacter</i> fermentations ...                       | 86             |
| Lignoceric acid from <i>Cerbera odollam</i> ...                             | 21             |
| „ <i>Holarrhena antidyserterica</i> ...                                     | 25             |
| Linolenic acid from <i>Holarrhena antidyserterica</i> ...                   | 25             |
| Linolic acid from <i>Anona squamosa</i> ...                                 | 29             |
