Subject Index.

	PAGE
<i>Acacia farnesiana</i> as host for sandal	114
Acetone from fermentation of hydrolysed straw	100
Activated sludge—Oxidation of sulphur by	165
Adco applied to Kuttanad soils	9

Agar-agar unsuitable as emulsion-stabiliser	21
Alcohol from rice-straw	93
„ unsuitable as emulsion-stabiliser	21
Amino-acids without influence on enzyme-action	164
Ammonification affected by sulphur-oxidation	171
Amylase from cholam, action on potato-starch	31, 60
„ „ wheat	159
„ prepared by electro-ultrafiltration	70
γ -Amylodextrin of Baker and Hulton	33
Amylopectin from starch	67
Amylose hydrolysis influenced by salts	64
Analysis of soils—Mechanical	2, 49
Aniline acetate in estimating furfural	112
Aniline and ethyl carbethoxythiocarbonate	19
Arachidic acid—Melting point of	137
Arginine from Bengal and horse grams	156
Arylthiosemicarbazides and mustard oils	91
<i>Aspergillus candidus, flavus, nidulans, niger, oryzae</i> and <i>spinosum</i> in tan-liquors	175
„ <i>Inchuensis</i> —Development of tannase by	189
Avaram (<i>Cassia auriculata</i>) bark—Tan-liquor from	174
<i>Bacillus acetoethylicus</i> —Fermentation of straw-pentoses by	101
„ <i>acidi lactici, acetii</i> and <i>coli</i> in tan-liquors	175
Bacterial numbers in Kuttanad soils	8
Barbituric acid in estimating furfural	111
Barley-malt amylase compared with that of wheat	161
Behenic acid—Melting point of	137
Benzidine and ethyl carbethoxythiocarbamate	20
Benzyl mercaptan and sulphur monochloride	83
Binary mixtures of fatty acids and esters	141
„ „ triglycerides	126
Bromine in estimating furfural	111
<i>n</i> -Butyl mercaptan and sulphur monochloride	83
Butyric acid from straw	101
<i>Caesalpinia coriaria</i> —Tan-liquor from	174
Calcium content of <i>Dodonaea viscosa</i>	150
„ exchangeable, of Kuttanad soils	6
Caprin—Physical properties of	125
Carbethoxythiocarbamic ester—Derivatives of	16
Carbohydrates from <i>Dodonaea viscosa</i>	150
„ of Bengal gram and horse gram	154
Carbonylbenzidine	20
Casein unsuitable as emulsion-stabiliser	21
<i>Cassia auriculata</i> —Tan-liquor from	174
Cellulose from straw—Fermentation of	101

	PAGE
Chloride content of Kuttanad soils	7
Cholam (<i>Sorghum vulgare</i>) amylase and starch	31, 60
<i>Cicer arietinum</i> (Bengal gram)—Globulins of	153
Compound, $C_{12}H_{22}O_5N_4S_2$, from ethyl carbethoxythiocarbamate	17
" $C_{14}H_{26}O_6N_4$ " " 	17
Crops related to class of soil	53
Cystine from Bengal and horse grams	156
Depression of solidifying points of fatty acids	145
Dextrins from starch—Characterisation of	33
" —Studies on	31
" unsuitable as emulsion-stabiliser	21
Dialysis—Inactivation of enzymes by	162, 184
Diastase action influenced by neutral salts	63
" —Two components of	72
Diastatic hydrolysis by cholam amylase	34
Dibenzyl hexasulphide	81
" trisulphide	80
Di- <i>n</i> -butyl trisulphide	83
Diethyl trisulphide and hexasulphide	83
Dilatometric studies in enzyme action	57
$\beta\beta$ -Dinaphthyl trisulphide	82
<i>aa'</i> -Dinaphthylurea—Melting point of	20
2 : 5-Diphenyldiimino-2 : 3 : 4 : 5-tetrahydro-1 : 3 : 4-thiadiazole	88
Diphenyl disulphide	82
" hexasulphide, <i>pp'</i> -dibromo-	80
<i>sym</i> -Diphenylhydrazodithiocarbonamide	88
Diphenyl trisulphide, <i>pp'</i> -dibromo-	79
" " <i>pp'</i> -diiodo-	80
Diphenylurea from ethyl carbethoxythiocarbamate	19
Dipropyl trisulphide	83
2-Di- <i>p</i> -tolylamidino-3-keto-5-ethoxydihydro-1 : 2 : 4-triazole	18
2 : 5-Ditolyldiimino-2 : 3 : 4 : 5-tetrahydro-1 : 3 : 4-thiadiazole	89
Di- <i>p</i> -tolylguanidine and ethyl carbethoxythiocarbamate	18
<i>sym</i> -Di- <i>o</i> - and <i>p</i> -tolylhydrazodithiocarbonamide	89
Ditoly trisulphide and hexasulphide	78
Di- <i>o</i> - and <i>p</i> -tolylurea from ethyl carbethoxythiocarbamate	19
Divi-divi (<i>Caesalpinia coriaria</i>)—Tan-liquor from	174
<i>Dodonaea viscosa</i> —Spike-disease of	147
<i>Dolichos bitorus</i> (horse gram)—Globulins of	153
Drop-number measurement of interfacial tension	23
Electro-ultrafiltration in preparing amylase	69
<i>Eleusine coracana</i> (ragi)—Globulin of	157
Emulsin action on salicin	59
Emulsions—Causes of stability in... ..	29
" —Petrol-water	22

	PAGE
Emulsions—Viscosity of	27
Enzyme action—Dilatometric studies of	57
" " influenced by salts	61, 63
" " from cholam	31
" " wheat	160
2-Ethoxy-4:5-benzo-7-ketotetrahydro-1:3:6-heptatriazine	17
2-Ethoxy-4:6-diketo-3:4:5:6-tetrahydro-1:3:5-triazine	19
2-Ethoxy-7-ketotetrahydro-1:3:6-heptatriazine	16
2-Ethoxy-4-thio-6-keto-3:4:5:6-tetrahydro-1:3:5-triazine	19
Ethylenediamine and ethyl carbethoxythiocarbamate	16
Ethyl mercaptan and sulphur monochloride	82
Fatty acids—Binary mixtures of	143
Fermentation of hydrolysed rice-straw	98
" " tan-liquors	173
Foodstuffs, Indian—Proteins of	153
Fungi in Kuttanad soils	8
" " tan-liquors	175
Furfural—Estimation of	111
" " from rice-straw	98
Gallate, methyl—Action of tannase on	61, 180
Gallic acid—Estimation of	193
" " from tannic acid	182
Gelatin unsuitable as emulsion-stabiliser	21
Globulins of Bengal gram and horse gram	153
Glucose from rice-straw	98
" unsuitable as emulsion-stabiliser	21
Glycerides—Physical properties of	121, 125
Glycerol—Acylation of	130
" unsuitable as emulsion-stabiliser	21
Glycogen hydrolysis influenced by salts	67
Gram—Globulins of	153
Gum arabic unsuitable as emulsion-stabiliser	21
Heterocycloids from ethyl carbethoxythiocarbamate	11
Hexasulphides, organic—Formation of	73
Hexoses from rice-straw	98
Histidine from Bengal and horse grams	156
Hydrazine hydrate and ethyl carbethoxythiocarbamate	17
Hydrogen-ion concentration affecting amylose hydrolysis	66
" " " " dextrin-hydrolysis	34
" " " " enzyme action	161
" " " " Kuttanad soils	6
" " " " tan-liquors	188
" " " " of emulsions	23
Hydrolysis of starch by taka-diastase	58
Inactivation of enzymes by dialysis	162

	PAGE
Interfacial tension—Measurement of	23
Invertase—Action on sucrose of	59
3-Keto-2-carbothiophenylamino-5-ethoxydihydro-1 : 2 : 4-triazole	18
3-Keto-2-carbothio- <i>p</i> -tolylamino-5-ethoxydihydro-1 : 2 : 4-triazole	18
3-Keto-5-ethoxydihydro-1 : 2 : 4-triazole	17
3-Keto-2-phenyl-5-ethoxydihydro-1 : 2 : 4-triazole	18
Kuttanad—Distribution of paddy lands in	1
Lauric acid, allyl ester and its dibromide	133
" " —Physical properties of	119
Laurin—Physical properties of	125
Leaf-insertion transmission of spike-disease	115
Lignin from rice-straw—Hydrolysis of	103
Lignoceric acid from <i>Adenanthera pavonina</i>	142
Limbdi State—Soils of	43
Lime content of Nalkantha soils	46
" requirement of Kuttanad soils	6
Linoleate (potassium) as emulsion-stabiliser	21
Lysine from Bengal and horse grams	156
Magnesia content of Nalkantha soils	46
Malt-diastase—Action of	63
Melanin from Bengal and horse grams	156
" " <i>Dodonaea viscosa</i>	149
Melting points, double	120, 156
Mercaptans—Action of sulphur monochloride on	73
Microbiology of activated sludge	170
<i>α</i> -Monocaprin, its diphenylurethane and <i>p</i> -nitrobenzoyl derivative	133
<i>α</i> -Monocaprylin	133
<i>α</i> -Monochlorohydrin and potassium palmitate	132
<i>α</i> -Monoglycerides—Preparation and physical properties of	128
<i>α</i> -Monolaurin, <i>α</i> -monomyristin and <i>α</i> -monopalmitin	132
<i>α</i> -Monostearin	130
<i>Mucor mucedo</i> , <i>racemosus</i> and <i>rouxii</i> in tan-liquors	175
Mustard oils and arylthiosemicarbazides	91
Myristic acid—Physical properties of	119
Myristin—Physical properties of	125
Myristyl chloride condensed with <i>isopropylidene</i> glycerol	132
Myrobalans (<i>Terminalia chebula</i>)—Tan-liquor from	174
Nalkantha district (Limbdi State)—Soils of	43
<i>α</i> - and <i>β</i> -Naphthylamines with ethyl carbethoxythiocarbamate	19
<i>β</i> -Naphthyl mercaptan and sulphur monochloride	82
Neutral salts affecting enzyme action	63
Nitrates from Kuttanad soils—Absence of	5
Nitrification affected by sulphur-oxidation	171

	PAGE
β -Nitrobenzoyl chloride and α -monocaprin	133
" " " " α -monocaprylin	134
Nitrogen content of Kuttanad soils	4
" " " Nalkantha soils	46
" " " distribution in Bengal and horse grams	156
" " " <i>Dodonaea viscosa</i>	149
Oleates as emulsion-stabilisers	21
Paddy lands in Kuttanad—Distribution of	1
Palmitates as emulsion-stabilisers	21
Palmitic acid—Physical properties of	119
Palmitin—Physical properties of	125
Palmityl chloride condensed with isopropylidenglycerol	132
Paper from rice-straw	107
Patch-grafting transmission of spike-disease	113
<i>Penicillium brevicaulis</i> , <i>camemberti</i> , <i>claviforme</i> , <i>glaucum</i> , <i>granulatum</i> , <i>oxalicum</i> and <i>X</i> , in tan-liquors	175
Pentosans and pentoses—Estimation of	110
Pentoses from rice-straw	98
Pepsin as an enzyme-activator	163
Petrol-water emulsions	21
Phenyl isocyanate and α -monocaprin	133
" " " " α -monocaprylin	134
<i>o</i> -Phenylenediamine and ethyl carbethoxythiocarbamate	11
Phenylhydrazine and ethyl carbethoxythiocarbamate	18
" " in estimating furfural	111
Phenyl mercaptan and sulphur monochloride	81
" " β -bromo- and sulphur monochloride	79
" " β -iodo- and sulphur monochloride	80
Phenylthiosemicarbazide and ethyl carbethoxythiocarbamate	18
" " " " sulphur monochloride	88
2 : 5-Phenyl- <i>o</i> - and <i>m</i> -tolylidimino-2 : 3 : 4 : 5-tetrahydro-1 : 3 : 4-thiodiazole	91
Phenyinrazole from ketophenylethoxydihydrotriazole	18
2 : 5-Phenyl- <i>m</i> -xylylidimino-2 : 3 : 4 ; 5-tetrahydro-1 : 3 : 4-thiodiazole	92
Phloroglucinol in estimating furfural	111
Phosphates replacing peptone in fermentation	100
Phosphorus content of <i>Dodonaea viscosa</i>	150
" " " Kuttanad soils	4
" " " Nalkantha soils	46
Potash content of <i>Dodonaea viscosa</i>	150
" " " Kuttanad soils	4
" " " Nalkantha soils	46
<i>iso</i> Propylidenglycerol condensed with palmityl chloride	132
" " " " stearyl chloride	130
Propyl mercaptan and sulphur monochloride	83
Protein-nitrogen in <i>Dodonaea viscosa</i>	149

	PAGE
Proteins of Indian foodstuffs	153
Ragi (<i>Eleusine coracana</i>)—Globulin of	157
Refractive index of triglycerides	122
<i>Rhizopus nigricans</i> in tan-liquors	175
Rice crops in Kuttanad	1
„ straw—Alcohol and paper from	93
Rosin unsuitable as emulsion-stabiliser	21
Saccharification by cholam-amylase	34, 60
„ „ taka-diastrase	58
<i>Saccharomyces apiculatus</i> in tan-liquors	175
Salicin—Action of emulsin on	59
Salts affecting enzyme action	61, 63, 163
Sandal (<i>Santalum album</i>)—Spike-disease of	113
„ compared with <i>Dodonaea viscosa</i>	147
Soaps as emulsion-stabilisers	21
Soils of Central Travancore	1
„ „ Nalkantha district (Limbdi State)	43
Solidifying points	120, 136
<i>Sorghum vulgare</i> (cholam)—Amylase from	31
Spike-disease of <i>Dodonaea viscosa</i>	147
„ „ sandal	113
Stabilisers for petrol-water emulsions	21
Starch—Action of cholam-amylase on	31, 60
„ hydrolysed by taka-diastrase	58
„ hydrolysis influenced by salts	67
Stearates as emulsion-stabilisers	21
Stearic acid, its allyl ester and dibromide	131
„ „ chloride and methyl ester	130
„ „ —Physical properties of	119
Stearin—Physical properties of	125
Stearyl glycollic acid	131
Straw—Alcohol and paper from	93
Sucrose—Action of invertase on	59
„ unsuitable as emulsion-stabiliser	21
Sugars from rice-straw	95
Sulphate content of Kuttanad soils	7
Sulphur—Biological oxidation of	165
„ monochloride and mercaptans	73
„ „ „ phenylthiosemicarbazide	88
Surface-tension—Measurement of	124, 134
Taka-diastrase—Hydrolysis of starch by	58
Tan-liquors—Fermentation of	173
Tannase action on methyl gallate	61, 180
„ —Preparation and purification of	178
Tannic acid—Estimation of	193

	PAGE
Tannic acid—Hydrolysis of, by tannase	182
Tension—Measurement of interfacial	23
<i>Terminalia chebula</i> (myrobalans)—Tan-liquor from	174
Thiourea and ethyl carbethoxythiocarbamate	19
<i>o</i> - and <i>p</i> -Toluidine and ethyl carbethoxythiocarbamate	19
<i>p</i> -Tolyl mercaptan and sulphur monochloride	78
<i>o</i> -Tolyl mustard oil and phenylthiosemicarbazide	91
<i>p</i> -Tolythiosemicarbazide and ethyl carbethoxythiocarbamate	18
" " sulphur monochloride	89
2 : 5- <i>o</i> -Tolyl- <i>m</i> -tolyldiimino-2 : 3 : 4 : 5-tetrahydro-1 : 3 : 4-thiodiazole	91
2 : 5- <i>o</i> -Tolyl- <i>m</i> -xylyldiimino-2 : 3 : 4 : 5-tetrahydro-1 : 3 : 4-thiodiazole	91
Transmission of spike-disease	113
Travancore—Low-lying soils of Central	1
Triglycerides—Physical properties of	125
Trisulphides—Formation of organic	73
Tryptophan from Bengal and horse grams	157
Tyrosine from Bengal and horse grams	157
Ultrafiltration in preparing enzymes	71
Urazole from ethoxyurazole	18
Urea and ethyl carbethoxythiocarbamate	19
Virus disease of <i>Dodonaea</i> and <i>Zyzyphus</i>	152
Viscosity of emulsions	27
" " triglycerides	123
Wheat-amylase	159
Xylose from rice-straw	98
2 : 5- <i>m</i> -Xylyl- <i>m</i> -tolyldiimino-2 : 3 : 4 : 5-tetrahydro-1 : 3 : 4-thiodiazole	91
Yeast (<i>saccharomyces apiculatus</i>) in tan-liquors	175
<i>Zyzyphus oenophia</i> —Spike-disease of	151
