Preface

Special Issues on Organic Synthesis—List of Contributions

B. Gita and G. Sundararajan	Vinylidene complexes in organic synthesis	355
J. Madhusudana Rao and T. Bharathi Rao	Asymmetric synthesis using phase transfer catalysis	373
S.K. Nayak S.M. Kadam S. Talukdar and A. Banerji	Low-valent titanium: New synthetic applications	401
Javed Iqbal Beena Bhatia and Vibha Khanna	Cobalt carbonyls: A versatile reagent and catalyst in organic synthesis	411
I.N. Narayanan Namboothiri and S.N. Balasubrahmanyam	Transformations in bromo- and alkoxybenzotropones	473
T.R. Kasturi and J.A. Sattigeri	Chemistry of spirodienones—A brief overview	487
H. Mohindra Chawla and K. Srinivas	Synthesis of new fluorescent ionophores. First examples of calix-coumarin analogs	515
P. Bijoy R.G. Naik Uma Shivkumar and G.S.R. Subba Rao	Total synthesis of ring-A aromatic steroids	519
