Volume 49 (1967)

	PAGE
Behaviour of specific heat C_p , thermal expansion β and compressibility k_T near magnetic transitions. (Gambhir, Vaidya and Gopal)	48
Design, development and construction of a linear oscillating electric machine. (Narayanan)	28
Heat transfer in a flow of viscous incompressible fluid in a cylinder and cylindrical annulus. (Tikekar)	1
Melting phenomenon in solidified gases. (Gopal, Vaidya, Gambhir and Govindarajan)	61
Microbial decomposition of pectic substances. (Jayasankar, Agate and Bhat)	10
Non-linear waves in radiation-gas-dynamics. (Phoolan Prasad)	148
(On) Numerical measures of singularity of a matrix. (Syamal Kumar Sen)	37
Simulation of Rayleigh-Pearson random walk on computers (Syamal Kumar Sen)	19
Slow steady motion of an elastico-viscous fluid with heat transfer in a wavy channel. (Mathur)	71
Stability of equatorial disturbances in an idealized dipole magnetic field embedded in a nonuniform atmosphere. (Bhatnagar and Devanathan)	141
Thermodynamic properties of methylene chloride. (Seshadri, Viswanath and Kuloor)	117
Transport processes in a multicomponent assembly on the basis of reconsidered generalized B-G-K-collision model (Srivastava)	131
