Book Review Index

Abusing science: The case against creationism by Philip Kitcher, reviewed by T. Ramakrishnan 151

Alpine flora of Kashmir Himalaya by U. Dhar and P. Kachroo, reviewed by Cecil J. Saldanha 154

Azospirillum II—Genetics, physiology, ecology edited by W. Klingmuller, reviewed by T. Ramakrishnan 193

Basic techniques in ecological farming: The maintenance of soil fertility by Stuart Hill and Pierre Ott, reviewed by J. S. Kanwar 154

- The biological chemistry of iron by H. B. Dunford, D. Dolphin, K. N. Raymond and L. Sieker, reviewed by P. Balaram 155
- Cell biology : A molecular approach by Robert D. Dyson, reviewed by S. Mahadevan 107
- The enchanted ring : The untold story of penicillin by John C. Sheehan, reviewed by P. K. Bhattacharyya 45
- Essentials of cell biology by Robert D. Dyson, reviewed by S. Mahadevan 107
- Genetic alchemy : The social history of the recombinant DNA controversy by Sheldon Kivinsky, reviewed by T. Ramakrishnan 46
- The inorganic chemistry of biological processes by M. N. Hughes, reviewed by V. Krishnan 50
- Jenner's smallpox vaccine by Derrick Baxby, reviewed by P. H. Prasad 51
- Lamarck the mythical precursor by Madeleine Barthelemy-Madaule, reviewed by Cecil J. Saldanha 195
- Modern concepts in biochemistry by Robert Bohinski, reviewed by C. S. Vaidyanathan 49
- Moulds—their isolation, cultivation and identification by David Malloch, reviewed by C. V. Subramanian 152
- Nature's second kingdom—Explorations of vegetality in the 18th century by Francois Delaporte, reviewed by S. K. Jain 108

INSTRUCTIONS TO AUTHORS

MANUSCRIPTS should be in English and written in a concise form. Three type-written double-spaced copies with one set of original Indian ink drawings and two sets of prints are to be submitted. The pages should be consecutively numbered and securely fastened.

TITLE PAGE should contain the following: (i) a brief title with suitable words for indexing; (ii) the names of the authors and the institution(s) where the work was carried out; (iii) a footnote with the present address of the authors, if different from (ii); (iv) a 100-word Abstract which summarises the significant results of the communicated paper; (v) key words for indexing and information retrieval; (vi) major discipline; and (vii) a running/short title.

TEXT should begin on page 2. It is preferable to break up the text into different sections, with suitable numbered headings, such as: 1. Introduction, 2. Experimental arrangement, 3. Theoretical analysis . . . and 7. Conclusions. Acknowledgements should appear at the end of the paper, but before the references.

REFERENCES should be indicated by Arabic numerals with superior/superscript letters, e.g., "Earlier Bose⁶ has measured . . .". A list of the references should be typed in double spacing on a separate sheet in the order of their occurrence in the text and appended at the end of the paper. References should be given with full details as in the following examples:

- (3) Ramakrishna Naidu, G. and Naidu, P.R. Isotopic exchange study of nickel xanthate in the presence of toluidines, *Proc. Indian Acad. Sci.*, 1978, 87A, 443-446.
- (8) Higdon, A., *Engineering Mechanics*, 1968, Vol.1, Ch.3, pp.79-104, Prentice-Hall, New Jersey.
- (9) Rama Murthy, K. *Convergence of state distributions in multi-type Bellman-Harris and Crump-Mode-Jagers branching processes*, Ph.D. Thesis, Indian Institute of Science, Bangalore, India, 1978.

LENGTH of papers: Up to 25 pages (about 7,000 words) for full papers and 6 pages (2,000 words) for short communications.

TABLES should be included only when considered essential. They should be numbered consecutively with Roman numerals and typed on separate sheets. Every table should contain a descriptive title.

FIGURES should be drawn with Indian ink on good tracing paper. It is most important that the lines and lettering are sufficiently bold to permit reduction to the Journal size. Captions should be typed on a separate sheet.

MATHEMATICAL SYMBOLS should be identified with pencil on the margins. Standard mathematical notations should be adhered to. Please distinguish between *kay* and *kappa*, *ell* and *one* and other similar symbols likely to cause confusion.

ABBREVIATIONS such as *e.g.*, *et al.*, and *i.e.*, can be used. If non-standard abbreviations or acronyms are used they should be explained where they appear first in the text.

GALLEY PROOFS will be sent to the authors for correction. They should be carefully scrutinized and corrected within three days of receipt.

REPRINTS: Fifty reprints to a single author and 100 for multiple authors are given free of cost. Additional reprints can be ordered while returning corrected galley proof. They are supplied at cost price plus handling charges.

MANUSCRIPTS should be sent to the Editor, JOURNAL OF THE INDIAN INSTITUTE OF SCIENCE, C/O IISc Library, Bangalore 560 012, India.
