(Section B: Physical and Chemical Sciences)

Volume 65

November 1984

Number 11

CONTENTS

Fluid Dynamics

- B.N. Mandal and R.N. Chakrabarti Singularities in a three-layered fluid medium 223

Elasticity

- H.S. Paul and R. Narasimhan Rayleigh waves in magneto-thermoelastic rotating media with thermal relaxation 245

Measure Theory

- P.C. Bhakta and Swapna Kundu On μ -separated sets and density of sets in uniform space 255

Integral Equations

- S.P. Malgonde and R.K. Saxena On a distributional generalized Stieltjes transformation 263

Short Communications

Numerical Analysis

- K. Raghavan A note on the nonsingular factorization algorithm for certain classes of matrices 271

Analytical Chemistry

- S. Singh, S.R. Tripathi, M.N. Tiwari, P.C. Yadava and K.L. Yadava A novel method for the determination of protonation constant 279

- S.S. Dhaktode and M.M. Palrecha Polarographic studies of zinc with succinic, glutaric and adipic acids 287

Review Paper

Coordination Chemistry

- G. Shankar, K. Paulraj, V. Balasubramanian and S.K. Ramalingam Substitution reactions of coordinated β -diketones β -ketoamines and thio β -diketones — A review 291
