

SUBJECT INDEX

	PAGE
Acetate, ethyl, specific heat of the vapour of ...	39
Acetone, specific heat of the vapour of ...	19
Air, supersonic velocity in ...	93
Alcohols, specific heats of the vapours of ...	39
Aliphatic diazo compounds, investigations on the nature of addition of— to conjugated double bonded systems ...	263
Barium chromate, <i>See</i> Chromates ...	111
Benzene, specific heat of the vapour of ...	19
1- <i>iso</i> Butyl-cyclopropane-1 : 2-dicarboxylic acid, synthesis of ...	283
Calcium chromate, decomposition of the mixture with ferric oxide ...	232
Calcium chromate, decomposition of the mixture with sodium carbonate ...	226
Calcium chromate, the 25% stage in the decomposition of ...	111
Calcium salts of organic acids from cane molasses, preparation and technical applications ...	127
Camphane series, synthetical investigations in the—, Part V ...	255
Camphorquinone, synthesis of Manasse's ketonic acid from ...	255
Cane molasses, a dry solid product from—, and its possible technical applications ...	139
Cane molasses, preparation and technical applications of mixed calcium salts of organic acids from ...	127
Cane molasses, researches on the utilisation of—, Part II ...	127
" " " III ...	139
" " " IV ...	149
" " " V ...	237
Cane molasses, vegetation experiments to determine the fertilising value of the solid products prepared out of ...	149
Carbon dioxide, supersonic velocity in ...	93

Carbon disulphide, supersonic velocity in	93
Carbon tetrachloride, specific heat of the vapour of	59
Chemical oxidisers, crop response to	171
Chloroform, specific heat of the vapour of	59
Chromates, reactions of—, at high temperatures. Part VIII	111
" " " IX	119
" " " X	225
" " " XI	287
" " " XII	309
Chromates of calcium, strontium and barium, the 25% stage in the decomposition of the	111
Chromium chromates, magnetic properties of	309
Chromium chromates, structures of	287
Chromium trioxide, thermal decomposition of	119
Diazomethane, action upon <i>cyclopenta-</i> and <i>cyclohexadienes</i> and their derivatives	263
Dichloromethane, specific heat of the vapour of	59
✓ Edible oils and fats, the effect of refining on the digesti- bility of	203
Ethyl acetate, specific heat of the vapour of	39
Ethyl diazo acetate, action upon <i>cyclopenta-</i> and <i>cyclohexa-</i> <i>dienes</i> and their derivatives	263
Ethyl ether, specific heat of the vapour of	19
Ethylene dichloride, specific heat of the vapour of	59
Fats, edible, the effect of refining on the digestibility of	203
✓ Fuller's earth, activation and clarifying properties of—, Part VI	331
✓ Fuller's earth, adsorption of colouring matter in decolorisation of oils	331
<i>cyclo</i> Hexadienes. <i>See cyclo</i> Pentadienes	263
<i>cyclo</i> Hexane, specific heat of the vapour of	19
n-Hexane, specific heat of the vapour of	19
Iodine values and refractive indices (of oils), the relation between the	219
Iron salts, influence on the oxidation of organic matter and release of plant nutrients	179

Manasse's ketonic acid, $C_{10}H_{16}O_3$, synthesis from camphor-quinone	255
Manganese and iron salts, influence on the oxidation of organic matter and release of plant nutrients	179
Methyl ether, specific heat of the vapour of	19
Molasses. <i>See</i> Cane molasses			
Nopinone, further attempts to synthesise	317
Oils, decolorisation of—, by Fuller's earth	331
Oils, edible, the effect of refining on the digestibility of	203
Oxidation of organic matter, influence of manganese and iron salts on the	179
<i>cyclo</i> Penta- and <i>cyclo</i> hexadienes and their derivatives, action of diazomethane and ethyl diazoacetate upon	263
Phosphoric acid in solution, the titrametric method of estimating	79
Piezoelectric quartz oscillators, measurement of the absolute frequency of	1
Pinane and its derivatives, the stereochemistry of	155
Pinane group, synthetical experiments in the—, Part VI	317
" " " VII	326
Pinenes, α - and β -, a new total synthesis of	324
Pinonic acid, further attempts to synthesise	317
Plant nutrients, oxidation of organic matter and release of	179
1- <i>iso</i> Propyl-1-carboxy- <i>cyclo</i> propane-3-acetic acid, synthesis of	278
n-Propyl ether, specific heat of the vapour of	19
Refractive indices (of oils), the relation between the iodine values and—	219
Safflower oil, hardened	219
Solid-lime compound (obtained from cane molasses), nitrogen fixation by — in the soil, and its bearing on plant growth	237
Steam, supersonic velocity in	93
Strontium chromate, the 25% stage in the decomposition of	111
Supersonic velocity in gases and vapours—, Part IV	1
" " " V	19

Supersonic velocity in gases and vapours—, Part VI	...	39
" " " VII	...	59
" " " VIII	...	93
α -Thuja dicarboxylic acid, synthesis of an isomer of	278, 283	
Thujone, experiments on a total synthesis of	...	278
Thujone series, synthetical investigations in the—, Part VIII	...	249
" " " IX	...	275
" " " X	...	278
" " " XI	...	283
<i>iso</i> Thujone, synthesis of	249
Titrametric method of estimating phosphoric acid in solution, influence of certain anions on the accuracy of	...	79
2:2:3-Trimethyl- <i>cyclohexane-4-one-</i> carboxylic acid, synthesis of Manasse's ketonic acid from	255
Umbellulonic acid, a new method of synthesis	...	275
Verbenone, further attempts to synthesise	...	317
Verbenone, total synthesis of	324
