	PAGE.
Aerial Capacity Measurement	22
„ Inductance Measurement	22
„ Measurements	23
„ Resistance Measurement	26
„ Testing	21
„ —Wavelength of loaded	28
Aerials—Directive combinations of	10
„ —Effective resistance of	46
„ For wireless measurements	40
„ —Inductance of	58
Alternators—Double-synchronous speed	1
Amplifier—Resistance capacity type of	40
Anode—battery	41
„ —current	41
„ —resistance	41
Armature winding—Effect of asymmetry	30
Bridge—High Frequency Wheatstone	25
Calibrated mutual inductance for signal measurement	43
Capacity of an aerial	21
Characteristics of Beam Transmitting Aerials	9
Circulating currents in wave-wound armatures	29
Cylindrical parabolic reflectors	16
Dielectric resistance of a condenser	27
Dispersion of beam radiation	15
Double-synchronous speed alternators	1
Double synchronous speed alternators—Voltage regulation of	5
„ „ „ „ —Wave-form of line voltage	6
„ „ „ „ —Short-circuit conditions	6
„ „ „ „ —Cascade combination of	6
„ „ „ „ —Self-excitation of... ..	7
Effective capacity and inductance of aerials	23
Effective height of Madras (Fort) Radio station aerial	56
Field strength of Madras (Fort) Radio station measured at Bangalore	37
„ „ „ „ —Daily variations in	53
„ „ „ „ —Weekly average of	53
Flux distribution in a Rotary Converter	31

	PAGE.
Graphical methods of analysing tests on aerials...	22
Grid type aerials	10
" " reflectors	12
High-frequency Wheatstone Bridge	25
High speed types of double-synchronous speed alternators ...	5
Inductance—Measurement of mutual	43
" —Measurement of effective self-	58
Inductance of an aerial	21
Induction generator	4
Iron-in-hydrogen regulating resistances	42
Madras (Fort) Radio Field Intensity Measurements at Bangalore ...	37, 53
Marconi type beam aerial	17
Method of testing aerials... ..	21
Oscillation—Prevention of	48
Oscillator calibrated for signal measurements	48
Oscillograph records of armature current	30
Polar diagrams and dispersion	10
Potentiometer method of measuring small high-frequency voltages ...	45
Pull-out load of double-synchronous speed alternators	5
Radiators several wavelengths wide	14
Radio field measurements	37
" " " —Choice of apparatus for	38
" " " —Aerial and amplifier for	40
" " " —Calibrating circuits for	42
" " " —Procedure in working	47
" " " —Example of computation	52
" " " —Frame-coil calculation	57
Resistance—Aerial	26
" —Mullard type anode	41
" —Iron-in-hydrogen filament regulating	42
" —Measurement of effective	45
" —Variation of effective	46
Ripples superimposed on fundamental waves	35
Rotary converter—Current in armature of	29
Screened high-frequency bridge	25
Self-synchronising method of parallelling	3
Signal (Wireless) strength measurements	37
Thermal galvanometer for high frequency bridge	26
" " —Sensitiveness of	26
Unbalanced electromotive forces in armature	30
Vertical concentration of radiation	16
Wave-form of current in armature	33
Wavelength of loaded aerial	28
" Madras (Fort) Radio Station (VWM)	38
Wheatstone bridge—High-frequency type	25
